Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:

The Permittee is current relative to the required quarterly surface water monitoring requirements.

There are no pending compliance actions at this site.

The Permittee has informed the Division that it will be withdrawing the application to expand the coal storage capacity at this site by 150 acres, (Task ID # 2822). That application also contained information to address the requirements of the Division Order which was issued relative to design specifications and drawings. Mr. Dave Shaver has held discussions with Division personnel as well as the Wildcat site manager as to how to address the Division Order with minimum expenditure to the Permittee. A new application to document the requirements and commitments aired within those discussions is pending.
